

Project InVision International SMART Consulting Services

Put Project InVision International's expertise to work on your organization's unique challenges. Our professional services consultants help you achieve high returns on your investment in the shortest time frame possible.

The professional services team at Project InVision International (PII) can provide expertise in extending our adaptable platform to meet your business requirements. We've provided project and process management expertise and successfully implemented our software in diverse industries such as business consulting, systems integration, telecommunications, construction, accounting, supply chain management, and government agencies, among others.

OUR EXPERTISE IS YOUR ADVANTAGE

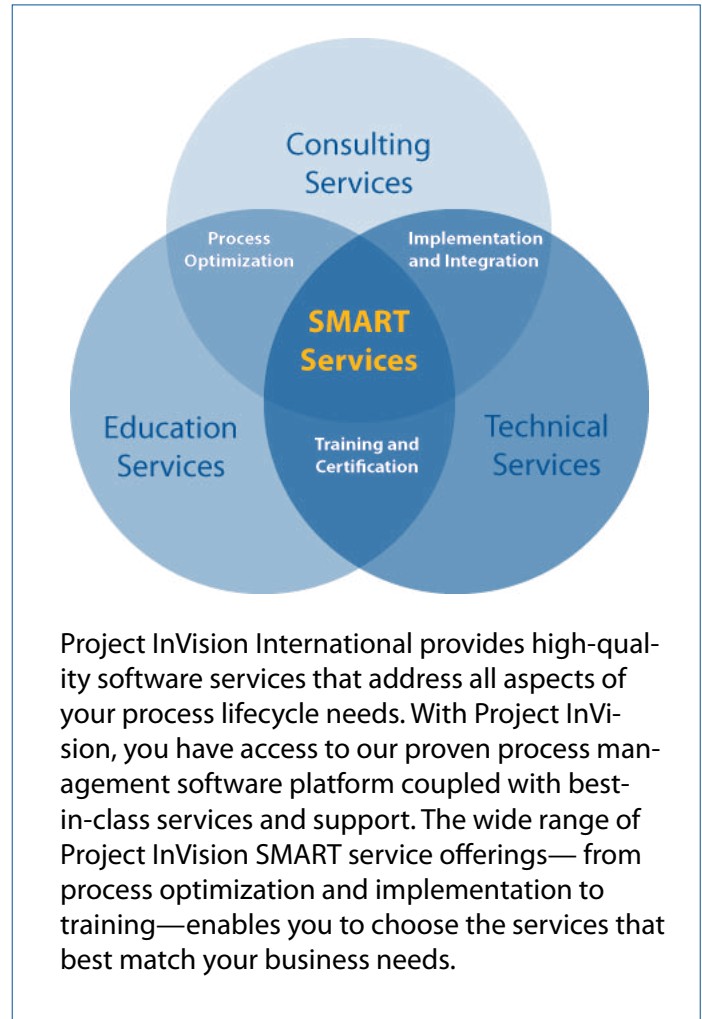

Your business can benefit from the experience our consultants have gained over more than a decade in project and process management. Areas of expertise include:

- Business Process Reengineering and Improvement
- Portfolio/Project Management Office Implementation
- Change Management
- Project InVision Implementations

TAKE THE SMART APPROACH

Our SMART Services allow your company to target specific areas for improvement, addressing the highest-impact areas first. Our SMART methodology (Specific, Measurable, Achievable, Relevant, Time-Bound) ensures that:

- Goals and initiatives are well-defined
- Initiatives address recognized business, project, or process areas causing the greatest pain
- Action plans are based on industry best practices or proven through successful implementations with other customers
- Deliverables include expectations for improvements and timing
- You will see immediate results from each SMART engagement

SMART CONSULTING SERVICES

Project InVision Deployment Methodology

Gain the strategic guidance and hands-on expertise you need to maximize your success. Our methodology and best practices help you avoid common deployment pitfalls and accelerate user adoption rates.

Alliance partners can begin to achieve a return on their investment even faster with our **SMARTstart** business development process. Our business development and professional services teams will work with you to ensure a successful sales strategy and a fast and efficient implementation.

Project/Portfolio Management Office

Whether you are creating a project management office (PMO) from the ground up or you are simply looking for ways to enhance your ability to deliver projects, PII professional services consultants can provide you with expert advice to maximize your results.

Our consultants will work with you to identify, assess, and optimize the four pillars of PMO success:

- Methodologies
- Tools
- Capabilities
- Culture

Rapidly define and implement a world-class PMO with our proven methodologies.

Issues & Escalation Management

Our professional services consultants can provide the expertise and tools to identify, monitor, control, and resolve issues in order to avoid surprises. We will show you how to integrate escalation procedures to address these issues in a timely and efficient manner.

Time Tracking

Make the best use of Project InVision Time Tracking to gain accurate visibility into your project's health and budget status. Leverage our team's expertise to help you:

- Simplify and automate the time entry process
- Reduce manual errors
- Prevent budget overruns
- Increase visibility into project health with real-time views of your operations

Governance & Gating

Governance and gating processes provide critical controls to your organization that impact the bottom line. Put our experience to work and ensure your projects get prioritized according to your key performance indicators.

Ensuring projects are appropriately and rigorously evaluated at each gate will make an immediate and significant impact to your bottom line. Each gate provides management the opportunity to "right the ship" should a project go astray.

Resource Management

With the exception of infrastructure, resources are a typically the largest expenditure for any business. We will show you how to best use Project InVision to manage and optimize the use of your expensive resources, your team. The resource management process gives complete visibility of resource availability across your enterprise helping your managers find the right resources to implement your strategic initiatives. Use Project InVision to forecast resource demand to ensure you have the right team in place not only for current priorities, but also to achieve your longer-term objectives.

ABOUT PROJECT INVISION INTERNATIONAL

Project InVision International provides software solutions to improve business performance to professional service firms and their clients including industry leaders like PricewaterhouseCoopers, KPMG International, AT&T, EDS, and TELUS. Project InVision's enterprise and on-demand platforms help businesses automate processes such as Project and Portfolio Management, Governance, Risk and Compliance, and Professional Services Automation.
