

# Project InVision Professional Services Automation

The Project InVision Professional Services Automation (PSA) solution helps your management team increase profits and control runaway project expenses by providing them the information and insight they need to be more effective. Project InVision PSA drives increased visibility, governance, and control, leading professional services firms to increased profitability and higher client satisfaction.

## THE PROFESSIONAL SERVICES SOLUTION

Project InVision PSA on-demand software automates your entire engagement lifecycle from client opportunities through project closure. Loaded with project templates and best practices, Project InVision PSA provides professional services organizations with the ability to:

- Achieve project governance, increase team accountability and shorten response times
- Improve visibility into client engagements
- Eliminate expensive “scope creep”
- Capitalize on revenue opportunities from change requests
- Deliver more projects on-time and on-budget
- Increase billable hours and resource utilization

Gain visibility and insight into your organization as you automate, accelerate, and improve your engagement management processes.

## MANAGEMENT ACROSS THE ENGAGEMENT LIFECYCLE

The on-demand Project InVision PSA solution streamlines your entire engagement delivery lifecycle – from new client opportunities, to resource planning, staffing, managing and delivering projects. Project InVision PSA provides the most comprehensive solution on the market today, without sacrificing ease-of-use. Each client team can select from any of our pre-configured modules or use our point-and-click administration to extend the application and create new modules.

## KEY FEATURES AND BENEFITS

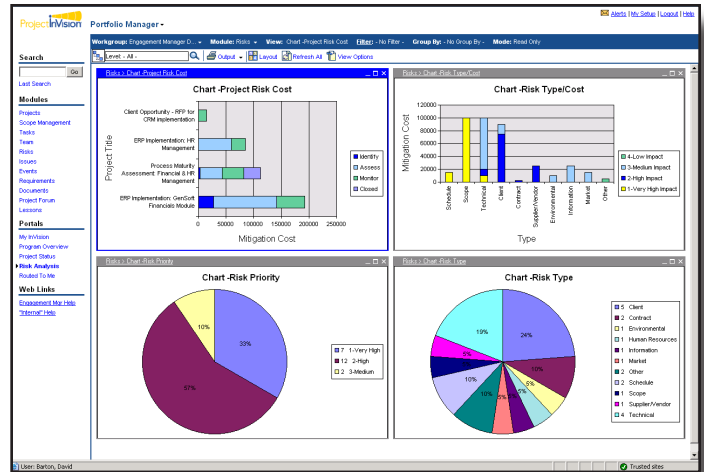

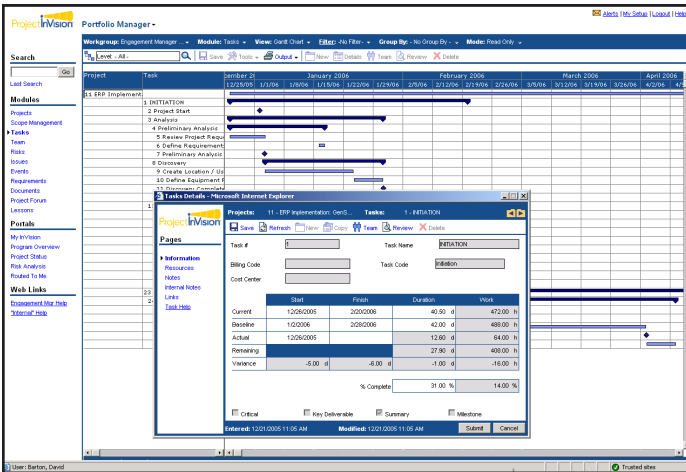

**Increase visibility.** Gain insight into your client engagements with easily customizable reports, views, client portals, and dashboards that provide a real-time snapshot of a single engagement or across the enterprise.

**Govern your processes.** Embed and automate your engagement processes to facilitate governance and consistency across all of the stages of your engagement lifecycle.

**Satisfy clients.** Exceed client expectations by delivering consistent communications, setting clear expectations, and increasing collaboration throughout the engagement process.

**Increase revenues.** Not only will you minimize revenue leakage and raise resource utilization, but you will be better positioned to capture add-on revenue opportunities with scope and change management capabilities.

Increase visibility and control across your organization with critical insight into your engagement portfolio.

## THE PROJECT INVISION DIFFERENCE

### On-Demand Business Performance Improvement

On-demand software has the potential to decrease your total cost of ownership by up to 75%. Our hosted solution can be up and running in days, with no software or hardware to buy, build, or maintain. You'll enjoy the same level of capabilities, customization, and security as an installed solution, with the added convenience of anywhere, anytime Web access.

### Comprehensive Process Management

One integrated solution makes implementing engagement management in your organization fast, easy, and cost effective. That's why the Project InVision platform is built to ensure that information flows seamlessly throughout your organization.

### Unprecedented Adaptability

Extraordinary adaptability – without programming – allows you to tailor the software to suit your needs and processes. With point-and-click ease, you can integrate your organization's terminology, workflows, and best practices. You can even customize reports, views, portals and dashboards to reflect the specific information that is important to you and your team.

### State-of-the-Art Security

Project InVision's security infrastructure ensures that the data your business depends upon is never compromised. We continually enhance our security infrastructure to provide the highest security and privacy for our customers' information.

## ABOUT PROJECT INVISION INTERNATIONAL

Project InVision International provides software solutions to improve business performance to professional service firms and their clients including industry leaders like PricewaterhouseCoopers, KPMG International, AT&T, EDS, and TELUS. Project InVision's enterprise and on-demand platforms help businesses automate processes such as Project and Portfolio Management, Governance, Risk and Compliance, and Professional Services Automation. Project InVision International, founded in 1991, is privately held and headquartered in the San Francisco Bay area.
